bluemonday

Summary

bluemonday is looking for a passionate Business Intelligence (BI) Consultant. If you are client-facing by nature; attain strong exposure in T-SQL, SSIS, SSRS, Power BI and ETL then we'd like to meet you. Our consultants have a strong mix of both technical skills and business experience. We are searching for hardworking and creative candidates with the right mix of skills to help our clients drive results.

Job Requirements

- Create, maintain, optimize stored procedure, databases and ETL processes
- Extract, consolidate and analyse data
- Write T-SQL queries, stored procedures and functions
- Database best practise experience, performance tuning and optimization
- Work with all levels of development from analysis through implementation and support
- Identify, analyse and understand supporting data to propose solid solutions.
- Develop and test issues aligned to specifications
- Interact with stakeholders to understand and gather requirements and business needs
- Work with the project team across functional areas
- Engage with stakeholders to gather requirements and to analyse needs in terms of reporting requirements

Skills Required

- 3+ years of full-time software development experience
- 3+ years' Microsoft Business Intelligence experience
- Consulting exposure advantageous
- Highly skilled in: MS SQL Server, SSIS, SSAS, SSRS & T-SQL
- Experience with tools such as PowerBI / Tableau OR similar
- Excellent written and verbal communication skills
